

ORIGIN
TEAK CABINETRY

Style

A long-forgotten art

Origin offers solid reclaimed TEAK cabinetry that far exceeds the existing standards for high-end cabinetry. Combining modern design and the artisan techniques used by fine furniture makers, Origin seamlessly blends modern function with handcrafted, old-world quality. The result is a space that has its roots in the past, but its function clearly in the present. Our solid frame construction and rustic patina speak to an artistry and history that is unmatched by manufactured, mass-produced cabinets.

Custom

Which means we listen

Whether for the home, office, or commercial environment, we want to know how you desire to live in your space, as well as how you want it to function. We work with you or your architect, designer, or contractor to bring you truly custom cabinets that are built to your specifications. If you plan to build from the ground up or just want to revitalize an existing space, we start with a clean sheet of paper to create the most intelligent and compelling solution for our customers. We can also transform your ideas for a specific drawer configuration, custom carving, mantle, doors, beams, or crown moldings into a space that truly speaks to your unique vision.

Eco Friendly

Dedicated to environmental responsibility

Origin builds from a limited supply of recycled teak that is re-milled from the planks and beams of old houses and other structures up to 100 years old. When these structures were built, larger and older teak trees were used as building material, a wood supply that is non-existent today. Due to the age of the trees from which it came, it is considerably more beautiful in grain pattern and color than other wood sources. Because of the age of the planks and timbers themselves, it is thoroughly dry, more stable and ideal for fine cabinetry. Origin cabinetry is also proud to offer non-toxic, FDA approved glue and low V.O.C. finishing to help protect the environment for generations to come.

Construction

Hand-crafted from the finest reclaimed teak

Every piece in the entire cabinet is solid wood. No plywood, particleboard, or veneers are used. Each cabinet is finished on all sides, both inside and out. Even when opened, the beauty of solid wood can be seen in the shelves and panels all the way through to the back of the cabinet. Our cabinets come standard with the following features:

- Solid, reclaimed teak
- Pegged mortise & tenon/dovetail joinery
- Furniture-grade inset doors and drawers
- Impeccable Hand-rubbed finishes
- 100% hand-made

To complement our solid teak cabinetry, we use BLUM "Tandem plus" concealed, full extension drawer runners with integrated BLUMOTION. Blum hardware offers unsurpassed running action, silent and effortless closing, and complete access to the drawer's interior.

Origin Woodworks

Custom carved beams, mantles and more

To complement your kitchen, bath, home entertainment and office cabinetry, we also offer other specialty custom products including oven hoods, corbels, island posts, and wall/ceiling cladding. We create beautiful, hand-made entry and interior doors. We can design decorative rustic beams, custom carved mantles and shelving. These items can be made using the same materials and finishes to compliment your cabinets.
